ACE Engineer

Offshore & Subsea Engineering Consulting | AI-Augmented Parametric Analysis

Engineering Intelligence
P.E. | 23 Years | Houston, TX

WHAT WE DO

Marine Installation Analysis
Vessel screening, lift studies, operability (DNV-RP-H103)

Pipeline Integrity
Wall thickness, freespan/VIV, on-bottom stability (DNV-ST-F101, RP-F105)

Mooring & Riser Design
OrcaFlex analysis, fatigue, metocean loading (API RP 2SK)

Structural Assessment
FEA, fitness-for-service, cathodic protection (API 579, DNV-RP-B401)

AI-Augmented Engineering
Overnight parametric sweeps, real-time operations support

> **1,292** parametric engineering cases screened overnight — from freespan VIV to deepwater installation

HOW WE WORK

TIER	SCOPE	TIMELINE
Screening	Parametric analysis, go/no-go report	48 hours **$5K–15K**
Detailed	OrcaFlex/FEA model, sensitivity studies	2–4 weeks **$25K–75K**
Operations	Real-time decision support	Ongoing **$10K/month**

STANDARDS

DNV | API | ASME | ISO | BS 7608

SOFTWARE

OrcaFlex | OrcaWave | ANSYS | Python/digitalmodel
